AI-Powered HR Recruitment & Screening Interview Voice Bot

AI-powered first-level interview screening voice bot with end-to-end recruitment workflow.

In the modern business environment, the recruitment process is a critical aspect of any organization's success. However, traditional recruitment methods can be time-consuming, costly, and inefficient, especially during the initial stages of screening.

Our HR Voice Bot, equipped with advanced AI technology, automates the first-level screening of candidates, providing businesses with significant ROI, cost savings, and improved efficiency. It can conduct initial interviews, evaluate candidate responses, and provide recommendations, all without human intervention.

This bot can be customized to align with your organization's specific requirements, ensuring that only qualified candidates progress to the next stage of the recruitment process. Digitalize the entire end-to-end recruitment process from interviews to offer letter to employee on-boarding.

Capabilities

Question Formats & Categories

Define question structures by roles and organize by category.

Question Definition

Create and manage custom interview questions.

AI-Powered Speech Recognition

Ensure accurate response transcription of interview answers.

Scoring Matrix Setup

Configure scoring criteria and evaluation logic.
