

roundinfinity

AI-Powered No-Code Platform For Workflow Automation

Without any coding, create mobile responsive custom business applications , workflows, dashboards, & integrations.

Harnessing the power of Round Infinity's no-code platform, businesses can rapidly create custom applications, automate workflows, and craft real-time reports and dashboards—all without a single line of code.

This transformative capability drives operational efficiency, slashes development and maintenance costs, and accelerates time-to-market.

The mobile-responsive self-service portals empower users to take control, enhancing customer satisfaction and streamlining processes. With seamless integration into external systems, data flows effortlessly, while the User 360 feature offers a holistic view of user interactions.

Together, these innovations enable precise, data-driven decision-making, maximizing ROI and propelling business growth.

Capabilities

Custom Apps & Workflows

Configure mobile-responsive business apps and workflows effortlessly.

Custom Reports & Dashboards

Without any coding, create custom reports, analytics & dashboards.

External Systems Integration

Seamlessly exchange data with external systems without coding.

Mobile Self-Service Portal

Allow users to self-serve, raise requests, check status, contact support, etc.

User 360 View

Gain a comprehensive view of user interactions and data across the platform.

WhatsApp Integration

Seamlessly send WhatsApp alerts as part of workflows to keep users informed.

Workflow Automation & SLAs

Automate task assignments, process flows routing & track SLAs/escalations.

Process History

Easily track who approved/worked on which business record, at what time.

Role-Based Access Control

Customize access levels and permissions for different users.

Custom Notifications & Alerts

Set up automated email, SMS, or Whatsapp alerts to keep users informed.

Document Generation

Auto-generate and manage documents within custom workflows.

Contextual Collaboration

Contextually collaborate and comment on any business record or workflow task.

Real-Time SLA Dashboard

Monitor SLA metrics in real-time with SLA dashboard available in each business app

Secured Data Access

Securely access, download, & search data or bulk upload data using CSV.

Payments Integration

Easily connect workflows with payment gateway to collect payments.

How it Works

1

No-Code Custom Apps & Workflows Builder

Configure new custom apps or modify out-of-box apps, attach workflow & provide access to users.

2

Mobile Responsive Self-Service Portal

Using mobile responsive self-service portal securely access business applications & complete workflow tasks.

3

360 View

Gain a comprehensive 360 view of user interactions and data across business applications.

5

No-Code External Systems Integration

Without any coding, easily pull and push data to or from RoundInfinity. Auto-generate REST APIs & data triggers to push or pull data.

4

No-Code Reports & Dashboards Designer

Without any coding, create custom reports, analytics & dashboards. Filter data & download to PDF or excel. Schedule to auto-generate.

Business Impact

Increased Operational Efficiency

Automate workflows, reducing manual effort and speeding up processes.

Cost Savings

Eliminate the need for coding, lowering development and maintenance costs.

Faster Time-to-Market

Quickly deploy custom apps and integrations, accelerating new product launches.

Enhanced Decision-Making

Real-time analytics and dashboards provide data-driven insights for better decisions..

Improved Customer Experience

Self-service portals empower users, leading to higher satisfaction and faster resolutions.

Demo

Applications & Workflows Builder

User Interface: Form Sections | Form Columns | Form Rules | Custom Validations | Master-Detail Relationships | Subtotals | Poster Columns | Payments | Action Buttons |

Security: Permissions | Properties | Delete

Process & Workflows: 1. Process Steps, SLA & Escalations | 2. Workflow Automation | 3. Workflow Mandatory Columns | 4. Columns Access | 5. First Assignment Automation |

Reporting & Integration: Document Generation | Get SQL | Data Push REST API | Data Triggers & Data Pull REST API | Schedule Data Uploads & SFTP Pull |

Notifications: Email & SMS Alerts | Reminders |

Reports Designer
